PROFESSIONAL SUMMARY

Lead Developer with 8+ years building full-stack products with React, TypeScript, Go, Python, and Node.js. Experience with LLM integration, workflow automation, and backend optimization.

WORK EXPERIENCE

AllClear.ai | Apr 2024 - Present

Lead Developer | Aug 2026 - Present; Senior Full Stack Engineer | Apr 2024 - Aug 2026

- Led onboarding and qualification improvements across the embedded partner app, customer portal, and backend services, helping lower cost per lead and increase customer contact rates.
- Designed and implemented configurable lead distribution, supporting partner-specific routing and weighted allocation across debt-relief providers.
- Reworked slow qualification flows across Cloud Functions and NestJS APIs, batching rule execution, reusing authentication tokens, and consolidating Firestore writes to reduce repeated backend work.
- Delivered CRM document generation and e-signature workflows with live status updates; integrated Cloud KMS encryption into applicant-data storage.
- Integrated OpenAI models into a NestJS classification service, with JSON response validation, error handling, request tracing, and automated API tests.
- Coordinated Claude and Codex agents for coding and review, validating changes before merging.

Software Engineer, DataRemote, Inc. | Jan 2022 - Apr 2024

- Developed React/TypeScript device-management interfaces, working with firmware engineers on the local web UI shipped with telecom devices.
- Built and maintained Python/Flask APIs with SQLAlchemy to support device-management workflows; packaged services with Docker.
- Implemented live device-status updates using Node.js and WebSockets, connecting backend events to the user interface.

Full-Stack Developer, JobCore Talent | Feb 2020 - Dec 2021

- Built employer-facing React features for recurring shifts, employee invitations, payroll reports, and subscription payments.
- Extended Python/Django APIs and PostgreSQL queries for shift assignments, time tracking, and payroll; corrected pay calculations and report data.
- Contributed to React Native mobile features for workers to manage job invitations, upcoming shifts, and payment history.

Founding Developer, ImRecruitable | Jan 2018 - Jan 2020

- Built and launched the initial college recruiting application from scratch with React, Node.js, Express, and MongoDB, delivering athlete profiles, college search, and coach recruiting tools.
- Implemented athlete and coach authentication, Stripe subscriptions, profile media uploads, and administrative approval workflows.

SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL

Frontend: React, React Native, Next.js, Redux

Backend & data: Node.js, NestJS, Express, Django, Flask, PostgreSQL, MongoDB, Firestore

Cloud & testing: Google Cloud, Firebase, Docker, GitHub Actions, Jest, Pytest, Playwright

EDUCATION

Bachelor of Science, University of Miami | May 2017
